

## Earth Testing Cable Reel

### Description

The earth testing lead is for performing R2 and main earth bond verification tests; the reel's long length makes it ideal for use in applications where standard test leads simply aren't long enough.

Made from tough resilient plastic with patented technology to ensure friction free winding for complete comfort and easy use.

### Range

| Item Code | Description                     |
