# DATA SHEET FOR STANDARD RANGE CIRCUIT PROTECTION 

| Switches | The most commonly used Wylex Standard range of consumer units are fitted with a single main switch isolating all circuits. Units of 2,3,4,6 and 8 ways are available in both insulated and metal enclosures with a 12 way unit available in a metal enclosure only. | BS 5419:1977. Double pole 240v 50Hz. <br> Category of duty: AC21 60A >1989, 100A After 1989 (for 2, 3, 4, 6 and 8 way). |
| :---: | :---: | :---: |
| Rewirable Fuses | The semi-enclosed or rewirable fuse is still the most economical method of over current protection and is fully recognised within the current regulations. <br> The tried and tested rewirable fuse is still used in the majority of new and rewired domestic installations where cost is the prime consideration | BS 3036:1958.5A - 30A. <br> Short circuit capacity 2kA <br> Category of duty: S2A |
| Cartridge Fuses | The cartridge fuse offers a mid cost option between rewirable fuses and MCB's. <br> They have a short circuit rating of 16.5 kA , which means that for the normal 100A single phase supply, no further consideration of fault level is necessary. | BS 1361:1971. 5A- 60A <br> BS 88: 35A \& 40A, rated at 240v 50Hz <br> Short circuit capacity 16.5kA |
| Plug in MCB's | Wylex Plug in MCB's, known as B Breakers, offer the convenience of simple restoration of supply by the resetting of a switch dolly or push button in the old style. <br> The MCB's are suitable for both new and existing installations where a Wylex "Standard range" consumer unit is installed <br> Old style (one) being described as having a black Wylex logo and triangle with SK inside it. <br> Old style (two) being described as having a red Wylex logo and slightly smaller in size, with coloured dollies. <br> New style being described as having a black logo and black dollies. | BS 3871: Type 3 (Push button style), 5 A is 1 kA , All other Amps are 2kA. BS 3871\& BSEN 60898: 6A - 40A Type 2 (old style), Short circuit protection is 3kA. <br> BSEN 60898 Type B (new style), Short circuit protection is 3 kA |
| Consumer Units | Factory built assemblies Including Amendment No 1, conditional rating 16kA (CM16) 6 way to 12 way. | BS 5486 Part 13: 1979. <br> Degree of protection : IP2X |
